

Abha Singh

Software Quality Engineer | QA Test Lead

SUMMARY

Results-driven Senior QA Engineer and QA Test Lead with 10+ years of combined experience across software development, manual testing, automation testing, API validation, and release quality. Strong hands-on exposure to Playwright, Selenium, Cypress, REST Assured, Postman, SQL, Java, JavaScript, and TypeScript. Experienced in building risk-based regression plans, validating REST APIs and UI workflows, analysing logs, mentoring QA engineers, and supporting high-quality releases across web, mobile, desktop, AI, healthcare, streaming, retail, and connected-device platforms.

WORK EXPERIENCE

01/2026 - 06/2026

QA Test Lead | Anthropic (Claude) via Testlio

Remote

- Spearheaded end-to-end QA for Claude AI across web, iOS, Android, desktop, and extension platforms, ensuring release readiness for assigned cycles.
- Designed risk-based regression strategies and release certification plans covering functional, exploratory, edge-case, UI, and API validation.
- Validated frontend workflows, backend APIs, AI features, file upload flows, account journeys, and cross-platform user experiences.
- Investigated production issues using logs, monitoring dashboards, analytics tools, screenshots, videos, and network traces to accelerate root cause analysis.
- Collaborated with product managers and developers to triage defects, clarify acceptance criteria, and reduce release risk.
- Mentored QA engineers, reviewed test cases, improved documentation quality, and guided testers during active regression cycles.

05/2024 - 12/2025

QA Tester | Tinder via Testlio

Remote

- Executed functional, regression, exploratory, and cross-platform testing across Tinder Web, Android, and iOS, achieving 95%+ on-time completion for assigned test cycles.
- Validated subscription, payment, account management, AI recommendation, profile, user engagement, and checkout workflows.
- Supported UI validation for web application flows and contributed reusable test cases from user stories and acceptance criteria.
- Performed API and data validation support where required to confirm backend behaviour, payment states, and feature eligibility.
- Identified critical production issues before release and partnered with developers to expedite defect resolution.

Freelance QA Tester | Testlio

Remote

- Tested high-profile applications across AI, healthcare, streaming media, retail, gaming, and connected-device platforms, including Peacock, Hallmark+, FOX, Keurig, Athena Health, and other global clients.
- Maintained 95%+ on-time test execution across assigned cycles while supporting multiple concurrent engagements.
- Performed testing across Chrome, Edge, Firefox, Safari, Android, iOS, connected devices, gaming consoles, Smart TVs, and desktop platforms.
- Enhanced defect reproducibility with logs, screenshots, videos, network traces, and diagnostic details, reducing back-and-forth with engineering teams.
- Supported compatibility, regression, smoke, exploratory, accessibility, and data validation testing across multiple environments.

07/2007 - 07/2013

Technical Leader | Wipro Technologies

Noida, India

- Delivered enterprise software solutions for Halliburton and other global energy clients within the oil and gas industry.
- Led development, testing, and production support across the SDLC, from requirements analysis through deployment.
- Used Java, SQL, XML, and enterprise application workflows to support scalable business applications and data validation.
- Collaborated with business stakeholders, architects, developers, and QA teams to design, test, and support reliable applications.
- Mentored junior engineers through code reviews, technical guidance, documentation, and engineering best practices.

PROJECTS**Playwright TypeScript QA Automation Framework**

- Built a UI and API automation framework using Playwright, TypeScript, Page Object Model, fixtures, reusable utilities, and test data management.
- Configured cross-browser execution on Chromium, Firefox, and WebKit with HTML reporting, screenshots, videos, traces, and retry logic.
- Added API testing support for REST endpoints and structured validation for response status, payload, headers, and business rules.
- Integrated Git, GitHub, and GitHub Actions concepts for CI/CD-ready test execution and portfolio presentation.

Hybrid Selenium Java Automation Framework

- Created a Selenium WebDriver framework using Java, TestNG, Maven, Page Object Model, reusable base classes, and browser configuration.
- Implemented framework concepts including DriverFactory, DriverManager, ThreadLocal, BaseTest, reusable page objects, and structured test suites.
- Added API automation learning coverage using REST Assured and Postman concepts for REST API validation.

SKILLS

Automation: Playwright, Selenium WebDriver, Cypress, Appium, REST Assured, Playwright API Testing, Postman, Page Object Model, Fixtures, Reusable Utilities, Data-Driven Testing, Parallel Execution, Cross-Browser Testing

Programming: Java, JavaScript, TypeScript, Python, SQL, HTML, XML, JSON

API & Backend Testing: REST APIs, API Validation, Microservices Testing Concepts, Request/Response Validation, Status Codes, Headers, Payload Validation, Test Data Setup, SQL Data Validation

Tools & DevOps: Git, GitHub, GitHub Actions, Jenkins, Maven, npm, Docker, BrowserStack, JIRA, TestRail, QASE, Prometheus, Grafana, Application Insights, Log Analysis

Currently Upskilling: Karate API Framework, Kafka Workflow Testing, Cypress for Angular UI Testing, Mocking, Seeding, and Synthetic Test Data Creation

EDUCATION

B.Tech - Information Technology | Uttar Pradesh Technical University, India

CERTIFICATIONS

ISTQB Certified Tester Foundation Level (CTFL) | ISTQB
