

Abha Singh

Software Development Engineer in Test (SDET) | Playwright | TypeScript | API Automation | UI Automation | ISTQB Certified

Cypress, TX 77433 | +1-346-592-9877 | chhavi.abha@gmail.com | linkedin.com/in/abha10 | abhamondal.github.io

PROFESSIONAL SUMMARY

ISTQB Certified SDET with 5+ years of software testing and 7+ years of software development experience across web, mobile, AI, enterprise, media, and connected-device applications. Skilled in Playwright, TypeScript, Selenium WebDriver, Cypress, REST APIs, Postman, SQL, GitHub Actions, CI/CD concepts, functional testing, regression testing, API validation, log analysis, and automation framework design using POM, fixtures, reusable utilities, parallel execution, and scalable test architecture.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript, Java, Python, SQL, HTML, XML, JSON

Automation: Playwright, Selenium WebDriver, Cypress, Appium, BrowserStack

API Testing: REST APIs, Postman, Playwright API Testing, REST Assured, API Validation

Framework Design: POM, Fixtures, Reusable Utilities, Data-Driven Testing, Parallel Execution, Cross-Browser Testing

CI/CD & Tools: Git, GitHub, GitHub Actions, Jenkins, Maven, npm, Docker, JIRA, TestRail, QASE

Monitoring: Prometheus, Grafana, Application Insights, Log Analysis

PROFESSIONAL EXPERIENCE

QA Test Lead | Anthropic (Claude) via Testlio

Jan 2026 - Jun 2026

- Led end-to-end QA for Claude AI across web, iOS, Android, and desktop platforms, supporting 100% release readiness for assigned cycles.
- Developed risk-based regression strategies and release certification plans to improve coverage through functional, exploratory, and edge-case testing.
- Partnered with developers and product managers to identify and resolve critical issues before production releases.
- Validated frontend workflows, backend APIs, AI features, and cross-platform user experiences for product reliability.
- Investigated production issues using logs, monitoring dashboards, and analytics tools to accelerate root cause analysis.
- Mentored QA engineers, reviewed test cases, and improved documentation standards across releases.

QA Tester | Tinder via Testlio

May 2024 - Dec 2025

- Executed functional, regression, exploratory, and cross-platform testing across Tinder Web, Android, and iOS, supporting 95%+ on-time completion of assigned test cycles.
- Validated subscription, payment, account management, AI recommendation, profile, and user engagement features across production releases.
- Created reusable test cases from user stories and acceptance criteria, improving regression efficiency and test coverage.
- Identified critical production issues before release and collaborated with developers to accelerate defect resolution.

Freelance QA Tester | Testlio

Jul 2022 - Present

- Tested high-profile applications across AI, healthcare, streaming media, retail, gaming, and connected-device platforms, including Peacock, Hallmark+, FOX, Keurig, Athena Health, and other global clients.
- Maintained 95%+ on-time test execution across assigned cycles while supporting multiple concurrent engagements.
- Contributed to successful production releases by identifying critical issues through functional, regression, exploratory, compatibility, and cross-platform testing.
- Improved defect reproducibility with logs, screenshots, videos, network traces, and diagnostic details, reducing back-and-forth with engineering teams.
- Tested across Chrome, Edge, Firefox, Safari, Android, iOS, connected devices, gaming consoles, Smart TVs, and desktop platforms.

Technical Leader | Wipro Technologies

Jul 2007 - Jul 2013

- Delivered enterprise software solutions for Halliburton and other global energy clients within the oil and gas industry.
- Led development, testing, and production support across the SDLC from requirements analysis through deployment.
- Collaborated with business stakeholders, architects, developers, and QA teams to design, test, and support scalable applications.
- Mentored junior engineers through code reviews, technical guidance, documentation, and engineering best practices.

FEATURED AUTOMATION PROJECTS

Playwright Cross-Browser Automation Framework

GitHub: github.com/abhamondal/playwright-cross-browser

Tech Stack: Playwright, TypeScript, REST APIs, POM, GitHub Actions, HTML Reports

- Built a cross-browser automation framework using Playwright and TypeScript with reusable POM components, fixtures, utilities, and environment configuration.
- Automated end-to-end UI scenarios across Chromium, Firefox, and WebKit with parallel execution and HTML reporting.
- Designed the framework to support CI/CD integration and future API automation expansion.

Hybrid Selenium Automation Framework

GitHub: github.com/abhamondal/HybridAutomationFramework

Tech Stack: Java, Selenium WebDriver, TestNG, Maven, REST Assured, Extent Reports

- Built a hybrid automation framework from scratch using Java, Selenium WebDriver, TestNG, Maven, and REST Assured API testing.
- Implemented POM, reusable utilities, configurable execution, cross-browser support, and Extent Reports.

EDUCATION & CERTIFICATIONS

B.Tech in Information Technology | Uttar Pradesh Technical University, India

ISTQB Certified Tester Foundation Level (CTFL)
